## **GME OFFICIAL RECOMMENDATION**

Dear Partner,

**Snap-On Climate Solutions** is glad to inform you that GME recommends our A/C unit ECK4000 for the distribution in the OPEL VAUXHALL network.

### **ECK4000 approval n. WE170005A**

Recommended for recharging and maintenance's operations on A/C systems with refrigerant HFO1234yf, this machine is the synthesis of Snap-On Climate Solutions technology and competence.

GME has already informed all their Branches, Dealers and Authorized Workshops about this official recommendation.

Snap-On Climate Solutions is engaged to supply the machines to the GME Branches and to Dealerships/Authorized Workshops.

We are sure that this new recommendation will further strengthen the business relationship between Your Esteemed Company and Snap-On Climate Solutions. We expect that you will be engaged to satisfy the OPEL VAUXHALL dealership network.

Remaining at your complete disposal.

Best regards,

Alberto Bechis  
Vice President
